Dr.Udul Hewage

South Australia Doctors Association

RE: Soluble insulin donation to Sri Lanka

We would like to sincerely thank the Sri Lankan community in Adelaide led by South Australian Doctors Association, for donating 20000 soluble insulin vials, which will cover the nett requirement for one month for the whole country, on a request made by the Sri Lanka College of Endocrinologists /Sri Lanka Diabetes Federation.

Soluble insulin is an essential medication for Diabetic patients used in emergencies, by inward patients, children and pregnant patients. Short supply during past few months posed many difficulties to patients and doctors who treated these patients.

This donation is much appreciated in this critical time of drug shortage and this kind gesture from our fellow Sri Lankans living in Adelaide is heart warming.

We take this opportunity to thank Dr.Udul Hewage and Dr,Charitha Perera for initiating this insulin donation and for the commitment shown throughout the process of sending this insulin to Sri Lanka amidst many obstacles.

College of Endocrinologists will oversee the distribution process from MSD to send this insulin to the most needed hospitals across the country.

We hope you would continue to support Sri Lankan health care system during this difficult time.

Thank you

Yours sincerely

Dr.Chaminda Garusinghe

President
